Some scholars single out financial liberalization as a possible cause for crises, noting most emerging markets liberalized their financial sectors and capital flows during the 1980s and early 1990s. That deregulation was followed by a period of capital inflows that reversed at the threat of an impending crisis.

### What drives financial crises in emerging markets ...

A key element of the Chinn and Kletzer model is that financial crises may result from government guarantees to the private sector that encourage capital flows to emerging markets. As such guarantees have long been in place in many emerging markets, Chinn and Kletzer consider what might have precipitated the occurrence of crises in the 1990s.

### Lecture 18: Crises in Emerging Markets

Four factors seem to be behind the differentiated post-crisis behaviour of emerging-market countries, relative to their past and to advanced economies. The first and most obvious one is that the root of the problem was in the financial markets of advanced countries and that developing countries had a low exposure to these markets relative to other developed countries.

### The resilience of emerging markets during the global ...

chaPter 25 Financial Crises in Emerging Market Economies W-5 Because asset markets are not as large in emerging market countries as they are in advanced countries, they play a less prominent role in financial crises. Asset price declines in the stock market do, nevertheless, decrease the net worth of firms and so increase adverse selection problems.
