The Global History of Paleopathology : Pioneers and Prospects

Paleopathology, also spelled palaeopathology, is the study of ancient diseases. Studying pathologies, these abnormalities in biologic individuals and systems, may be intrinsic to the system itself or caused by an extrinsic factor. Any living organism can have pathology. Studies have historically focused on humans, but there is no evidence that humans are more prone to pathologies than any other animal. Paleopathology is an interdisciplinary science. The majority of the work has historically been
