A good way to check your answer, is to plug in the original function in your calculator and graph it. Now, plug in your answer and graph it on the same screen.

If you only see one function, then you wrote the function

Graph the following quadratic functions by using critical values and/or factoring. You need three points to graph and don't necessarily need all the information listed.

Remember: Option 1: If it factors, find the zeros. The middle of the two factors is the axis of symmetry.

Option 2: If it doesn't factor, find the axis of symmetry with  $2 b x a$
