with an optional parking brake pressure supply valve.

Hydraulic ABS (H-ABS) & Hydraulic Power Brake (HPB)

The ABS system on most domestic and import cars, trucks, and SUVs is controlled by an electronic brake control module (EBCM) that monitors multiple sensors on mechanical systems and relays data to the brake system for smooth and safe braking. However, just like any other electronic device, over time the EBCM could wear out or break.

How to Replace an Electronic Brake Control Module (EBCM ...

The EBCM is the central control unit for the electronic brakes, so if it fails, any electronically controlled braking features, such as the ABS and traction control, will be disabled. In some instances a failed EBCM may cause the traction control and ABS system to behave erratically, which can interfere with the handling and safety of the vehicle.
